Full-service API Documentation

This full-service package includes one written & edited tutorial, OpenAPI specification, Postman collection, a hosted documentation page, and more.

Quickstart guide

- A tutorial to get new users off on the right foot
- Includes:
    - One face-to-face collaboration & document review
    - Unlimited edits for the duration of the contract
    - A quick start guide, teaching a user how to send their first API request

Open API spec

- The most up-to-date version of an OpenAPI spec (OAS) for your REST API
- Includes:
    - 10 endpoints, fully documented
    - A custom linter for your API endpoints
    - Realistic examples, for best possible DX
    - Automatically generated code samples, in the languages of your choice

Postman collection

- A published Postman collection generated using your OAS spec
- Includes:
    - A Postman collection that never diverges from your OAS spec
    - A Postman environment, to minimize the time it takes for users to get up and running

API governance

- Automated tests to reduce the risk of errors in your documentation
- Includes:
    - Automatic enforcement of your OAS linter
    - Automated tests to ensure the documented response matches the actual response

Documentation hosting

- A fully hosted documentation page, to house your guides and API Reference
- Includes:
    - Custom color scheme
    - Custom domain
    - Staging environment
    - Continuous uptime monitoring

Version control

- Rest easy, knowing mistakes can be rolled back with the click of a button
- Includes:
    - CI/CD
    - Git repository of all the services above—deliverable upon request
